

实习生问题二

11月21号:

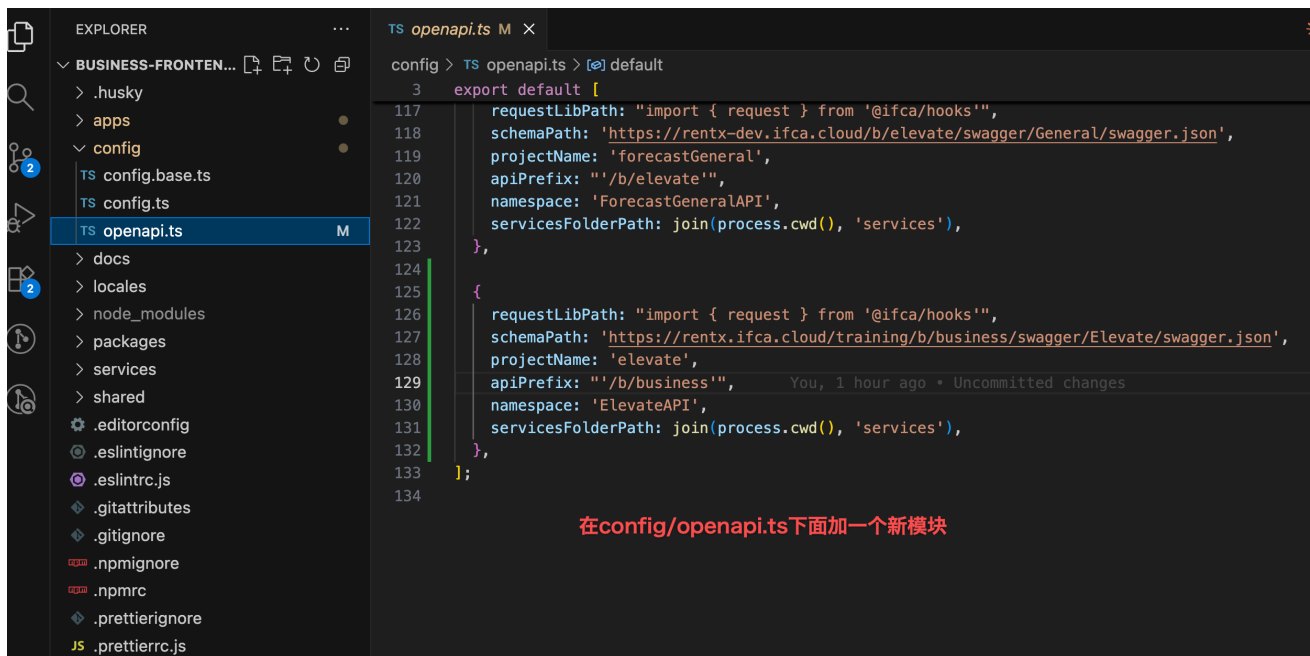

- 1、选择合同: SelectContract 组件
- 2、样式变量: apps/mobile/config/config.ts内定义一套tailwindCSS的样式变量, 注入到全局, 使用直接: --开头的样式变量, 如: var(--adm-font-size-10)
- 3、translateMessage与TranslateMessage的区别:
 - 共同点: 都是用来把多语言key显示成文案在UI界面上。 Common:AAA: "aaa"
 - 不同点: translateMessage 是一个方法, 渲染到界面上是string; TranslateMessage 是组件, 渲染到界面上是 span标签, 因此标签内可以套标签, TranslateMessage 可以自由发挥
- 4、如何与后端联调:
- apps/mobile/public/serverconfig.json5改为: <https://rentx.ifca.cloud/training>

The screenshot shows the VS Code interface. On the left, the Explorer sidebar displays the project structure for 'BUSINESS-FRONTEND-TRAIN'. The 'apps' directory is expanded, showing 'mobile' and 'public'. The 'public' directory is further expanded, showing files like 'ai', 'icons', 'map-designer', 'scripts', 'sso', 'test', 'workflow', 'devextremeLicenseKey.txt', 'favicon.ico', 'ifcaversion.txt', 'manifest.json', and 'serverconfig.json5' (which is selected and highlighted). On the right, the editor shows the content of 'serverconfig.json5'. The file is a JSON5 configuration for a mobile application. A red box highlights the 'appBaseUrl' property, which is set to 'https://rentx.ifca.cloud/training'. Other properties include 'reportBaseUrl2', 'reportBaseUrl', 'componentApiPrefix', 'appCode', 'cookiePath', 'virtualDir', 'locale', 'frontendLocaleName', 'modules', 'applicationUrl', 'inactivityTime', 'isEnabledTranslateMode', 'aiAgentAppCode', 'cryptoType', 'publicKey', 'privateKey', 'googleApiKey', and 'isIntegratedGoogleMap'.

```
1 {
2   // 请求地址, 如果需要连接本地后端, 请将 appBaseUrl 注释掉, 然后修改 config/
3   "appBaseUrl": "https://rentx.ifca.cloud/training",
4   "reportBaseUrl2": "http://localhost:5608/api/report/",
5   "reportBaseUrl": "http://localhost:5608/api/report/",
6   "componentApiPrefix": "/b/component",
7   "appCode": "erp",
8   "cookiePath": "/",
9   "virtualDir": "/",
10  "locale": {},
11  "frontendLocaleName": "zh-Hans"
12 },
13 "modules": [{
14   "moduleCode": "Workflow",
15   "applicationUrl": "http://localhost:8001"
16 }],
17 // 用户失活踢出时间, 单位 分钟, 不配置或者配置为0不启用
18 "inactivityTime": 0,
19 "isEnabledTranslateMode": true,
20 "aiAgentAppCode": "erp62-new-dev",
21 "cryptoType": "sm2",
22 "publicKey": "0484C7466D950E120E5ECE5DD85D0C90EAA85081A3A2BD7C57AE6",
23 "privateKey": "8EDB615B1D48B8BE18FC0F18EC08A41DF50EA731FA28BF409E6",
24 "googleApiKey": "AIzaSyAJyE-mpRAWhQVtbD6oL38ZHlXMr28_l2o",
25 "isIntegratedGoogleMap": true
```

- config/openapi.ts: schemaPath和apiPrefix根据swagger的蓝色地址来, projectName是微服务名

Elevate-提升 – 6 25-11-18 23:14:10

Elevate

OAS3

/training/b/business/swagger/Elevate/swagger.json

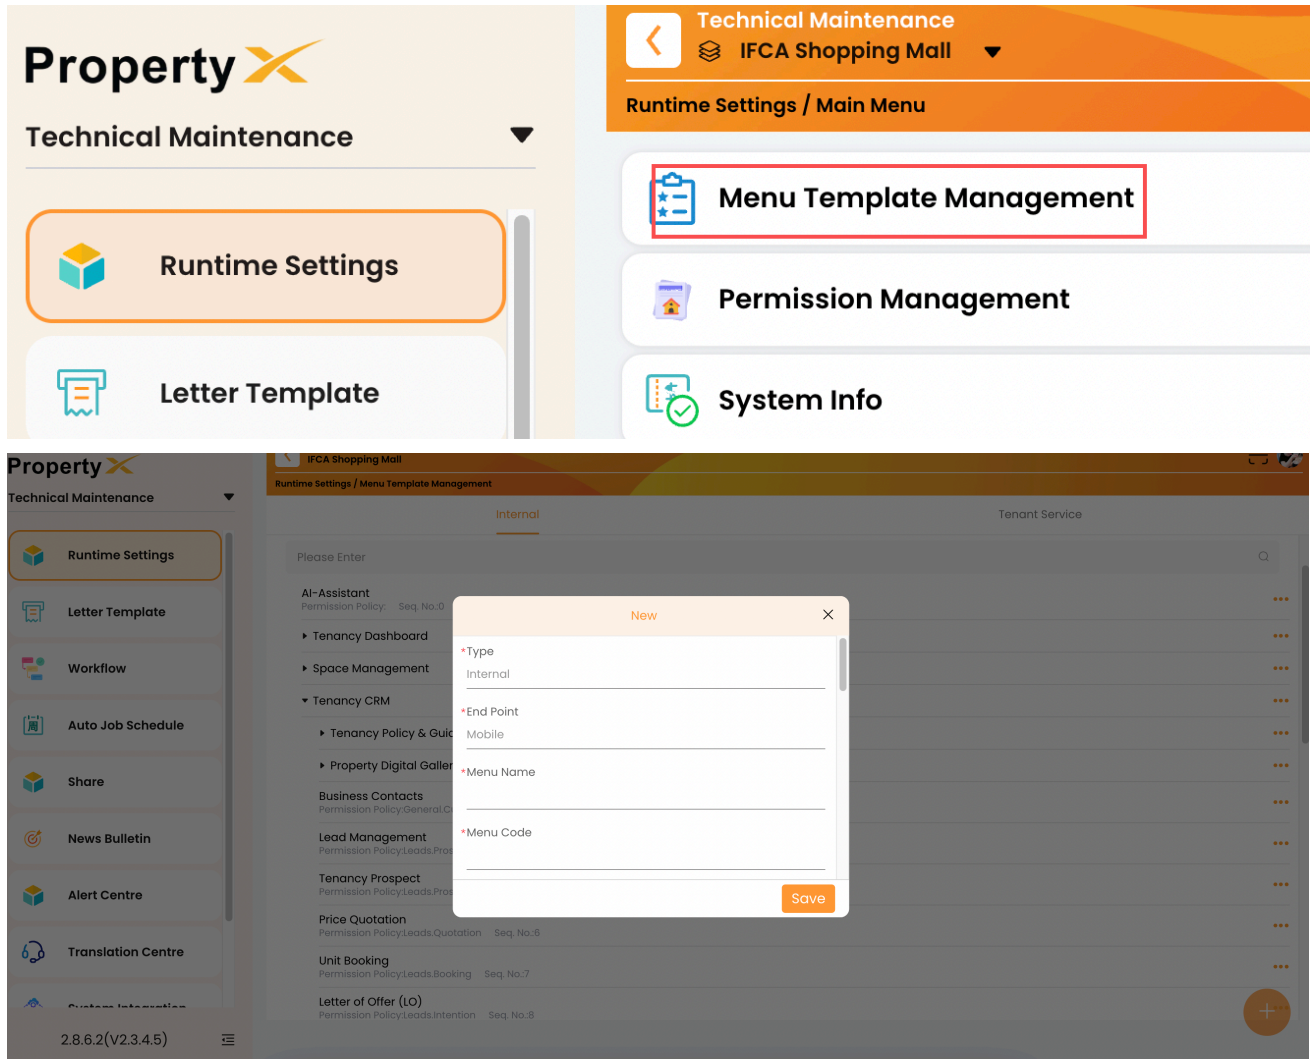

- 前端pnpm run openapi: 选择你的模块进行刷新service接口
- 5、选择人组件: SelectStaffForm 组件

权限

- 操作(功能)授权: api/app/authenticate-checker/granted-permissions这个接口, 存在就有操作权限。前端列表页和查看页只需要操作授权
- 数据授权: 前端的useAccess、列表接口的operation。前端列表页的卡片三个点里面除了查看都需要数据授权, 选择项目的projectId/companyId。

怎么配置权限

- 先建立一个菜单

Technical Maintenance

IFCA Shopping Mall

Runtime Settings / Menu Template Management

Please Enter

Permission Policy:Leads.Prose

Tenancy Prospect

Permission Policy:Leads.Prose

Error

- 建立了菜单，权限列表会多出一条权限，默认带有View的操作授权

- 这时候想要再建立一些别的按钮的权限，就在这个菜单下面建立，这里注意：新增和编辑的权限都叫Edit。例如：我现在建立一条Edit的权限
